DBL HRM Talent Hub

How DBL Group's manpower requisition, recruitment and onboarding system works — end to end, role by role.

WHO THIS IS FOR

DBL Group management, the CHRO and HR leadership, and everyone who sets up, runs or supports the hiring process.

SECTION 1

Introduction

1.1 Purpose of this document

This document describes the complete hiring workflow in **DBL HRM Talent Hub** as it runs in production: how a vacancy becomes an approved requisition, how candidates are found, assessed and selected, and how a selected candidate is brought through medical clearance, board approval and the offer to their first day.

It explains **who does what** at every step, the **rules the system enforces** along the way, and how people are kept informed. It is written for decision-makers and process owners; the step-by-step instructions for each participant are in the twelve role guides that accompany it.

1.2 What the system does

IN ONE PARAGRAPH

DBL HRM Talent Hub digitises DBL Group's paper **Employee Requisition Form** and everything that follows it. A raiser opens a requisition; the unit's HR writes the job analysis; a chain of named approvers signs it; Talent Acquisition publishes the job and collects CVs from every channel into one pipeline, screened by AI; candidates are tested and interviewed — first at the factory, then centrally; the panel scores them on DBL's ten criteria; the salary is fixed against the job grade; and the selected candidate is onboarded through documents, facilities, a two-signature medical, board approval on a Hiring Approval Sheet, an online offer and a final verification. Every step is recorded, and everyone involved is notified the moment something needs them.

At a glance	
Address	https://talenthub.dbl-group.com — any current browser, computer or phone
Lifecycle	Five phases: requisition → sourcing → assessment → selection → pre-employment & onboarding
Participants	Twelve system roles, plus board members, panelists and candidates who act from emailed links
Connected systems	ZingHR (employee master), Google Drive, Gmail and Calendar, BDJobs
Hosting	A dedicated server on DBL Group's network; documents in DBL's own Google Drive

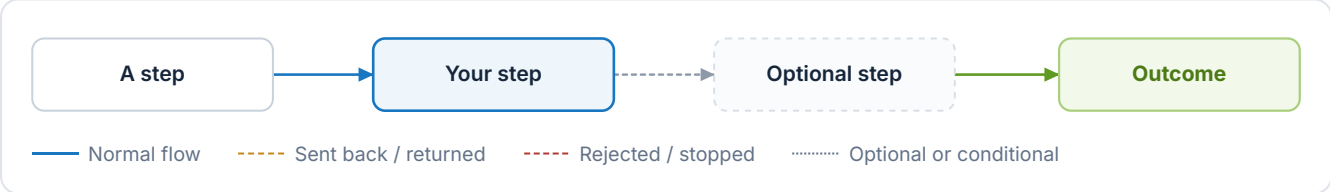

1.3 The document set

No.	Document	For
00	System Workflow (this document)	Management, HR leadership, system owners
01	Requisition Raiser	Department and division heads who raise requisitions
02	Factory HR	Unit HR: job analysis, CV intake, first interviews

No.	Document	For
03	Requisition Approver	Unit approvers, SBU Heads and other named approvers
04	Head of Talent Acquisition	Final approval, recruitment launch, approval sheets
05	CHRO	Escalations, approval sheets, letter signing
06	Board Member	Requisition and hiring approvals by emailed link
07	Corporate Recruiter	End-to-end recruitment and onboarding
08	Factory HR Head	First-interview finalist approvals
09	Interview Panelist & Interviewer	Panel scoring; delegated first interviews
10	Medical Officer & Central Medical Officer	Two-step medical clearance
11	The Candidate Journey	What applicants and new hires see
12	System Administrator & Super User	Access, set-up, integrations, records

1.4 How to read the diagrams

Diagrams use the same conventions throughout. A solid blue arrow is the normal flow; amber dashes mean something is sent back; red dashes mean a rejection or a stop; grey dots mean an optional or conditional path. Green boxes are successful outcomes, red ones are endings, and dashed grey boxes are steps that happen only in some cases. In a role guide, the reader's own steps are tinted blue.

SECTION 2

The system at a glance

One requisition, five phases, a dozen roles — and one record that follows the hire from the first request to the first day.

2.1 The hiring lifecycle

PHASE 1
Manpower Requisition
- Raise the requisition
- Job analysis
- Approval chain
- CHRO / Board (if escalated)

PHASE 2
Sourcing & CV Collection
- CV sources & recruiter
- Role profile & job posting
- CVs arrive from all channels
- AI screening & shortlist

PHASE 3
Assessment & Interviews
- Screening tests
- First interview
- Factory HR Head approval
- Second / final interview

PHASE 4
Selection & Salary
- Panel evaluation
- Salary fixation
- Mark as selected
- Regret letters

PHASE 5
Pre-employment & Onboarding
- Documents & facilities
- Medical clearance
- Board approval & offer
- Verification & joining

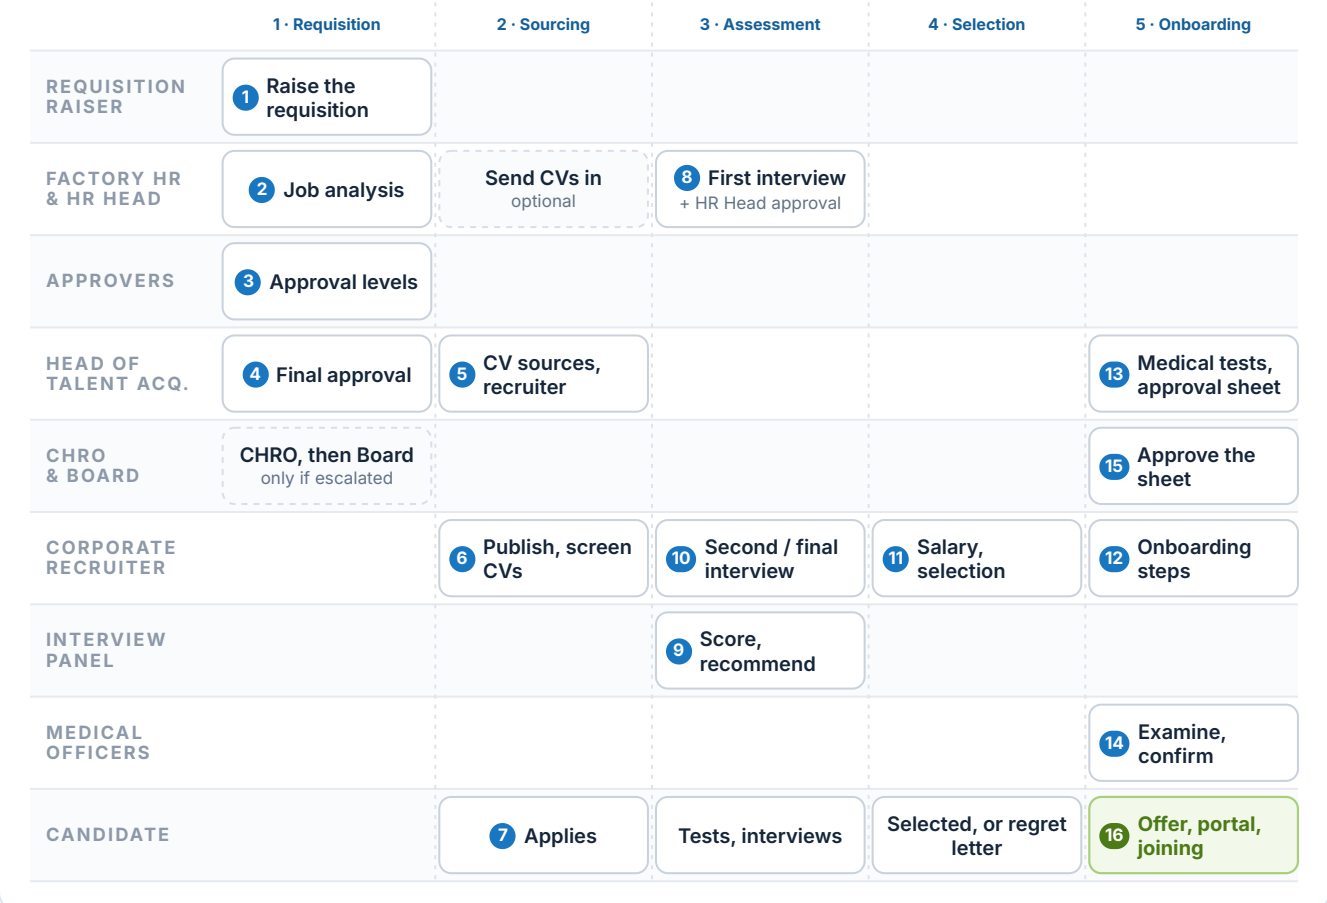

Figure 1. Who acts in each phase. Read left to right; step numbers give the order of the main path. Dashed boxes happen only in some cases.

2.2 Principles the system is built on

Principle	What it means in practice
Routing is configuration, not code	Who raises and who approves is set per unit and per raiser on Approval Paths. Changing the organisation never needs a software change.
Chains are fixed when a requisition is raised	The approval chain is copied onto each requisition, so editing Approval Paths never re-routes work already in flight.
Everyone sees their own business	Apart from group-wide HR roles, people see only what they raised, are named on, recruit for or were handed. A unit role does not expose colleagues' requisitions.
One owner, no lock-outs	Each approved requisition gets a Corporate Recruiter as its owner; Head of Talent Acquisition and the CHRO keep full access alongside.
Decisions belong to named people	Approval levels, first interviews and medical findings are personal. Nobody can act on someone else's step — except a super user, deliberately.
Every change is recorded	Requisitions keep their own history; the system-wide activity log records who changed what and when.
People are told, not left to check	In-app notifications, emails and a daily reminder reach whoever the work is waiting on.
Outsiders act through personal links	Board members, panelists, candidates and facility teams decide from emailed links without accounts.
One source of truth for people	Employees come from ZingHR every night; the organogram holds sanctioned and filled seats.

2.3 Who does what

R carries it out · **A** approves or decides · **C** contributes or can step in · **I** is informed.

Activity	Raiser	Factory HR	HR Head	Approver	HoTA	CHRO	Board	Recruiter	Panel	Medical	Candidate

Offer letter					C	C		R			A
Final verification and appointment					C	C		R			I

SECTION 3

Roles and participants

3.1 Roles in the system

Access is built from roles. Group-wide roles apply to every unit; unit roles apply to the unit they were granted for. A person can hold several roles, in several units.

Role	Scope	What it is for	How it is granted	Guide
Super User	All units	Full access to all data and to Access Control, System Activity and API Logs.	Access Control	12
CHRO	All units	Escalated requisitions, Hiring Approval Sheets, letter signatory, oversight.	Access Control	05
Head of Talent Acquisition	All units	Final approval, Approval Paths, launching recruitment, approval sheets, medical scheduling.	Access Control	04
Corporate Recruiter	All units	Runs recruitment for requisitions they are assigned to (or covering).	Access Control	07
Requisition Raiser	Per unit	Raises requisitions for the unit.	Automatic, from Approval Paths	01
Unit Approver	Per unit	Signs the levels they are named on; sees those requisitions.	Automatic, from Approval Paths	03
SBU Head	Per unit	Can be named as an approver; maintains Unit Configuration for their units.	Access Control	03
Factory HR	Per unit	Job analysis; sends CVs; runs delegated first interviews.	Access Control	02
Factory HR Head	Per unit	Approves first-interview finalists; sends CVs.	Access Control	08
Interviewer	Per unit	Runs first interviews for candidates handed to them — nothing else.	Automatic, on Send for interview	09
Medical Officer	All units	Examines candidates and records medical findings.	Access Control	10
Central Medical Officer	All units	Confirms, overturns or returns every medical finding.	Access Control	10

3.2 People who take part without signing in

Participant	How they take part
Board members	Approve requisitions the CHRO sends to the Board, and Hiring Approval Sheets, from personal emailed links.

Participant	How they take part
Interview panelists	Score candidates from a personal marking link; those who can sign in may use My Interviews instead.
Candidates	Apply on the careers page, track their application, sit online tests and complete onboarding on a personal portal.
Referring employees	Are named on a referral and receive a thank-you letter listing the candidates they referred.
Facility teams	Receive a request for each facility and confirm it is arranged from an emailed link.
IT team	Receives the Notify IT request for a new hire's work email — and, for a replacement, the deletion of the leaver's — at the address set on Integrations, and confirms from the link in it.
Medical team	Receives the pre-employment medical test letter with the date, time and venue.

3.3 Access and visibility rules

- **Sign-in needs a role.** Apart from the platform administrator, a person with no role cannot sign in. Naming someone on Approval Paths, or handing them a first interview, grants the minimum role automatically.
- **Group-wide HR sees everything.** Head of Talent Acquisition, the CHRO and super users see every requisition in every unit.
- **Everyone else sees their own business:** what they raised, what they are named on, what they recruit for, what they were handed, and — for Factory HR and their Head — their unit's requisitions in job analysis or open for CVs.
- **Removing a role tidies up after itself:** a raiser's chain is deleted, an approver is taken off every level, a Factory HR's queue is released — while requisitions already in flight keep their chain.

SECTION 4

Phase 1 — Manpower requisition

From a vacancy to an approved requisition: raise, analyse, approve.

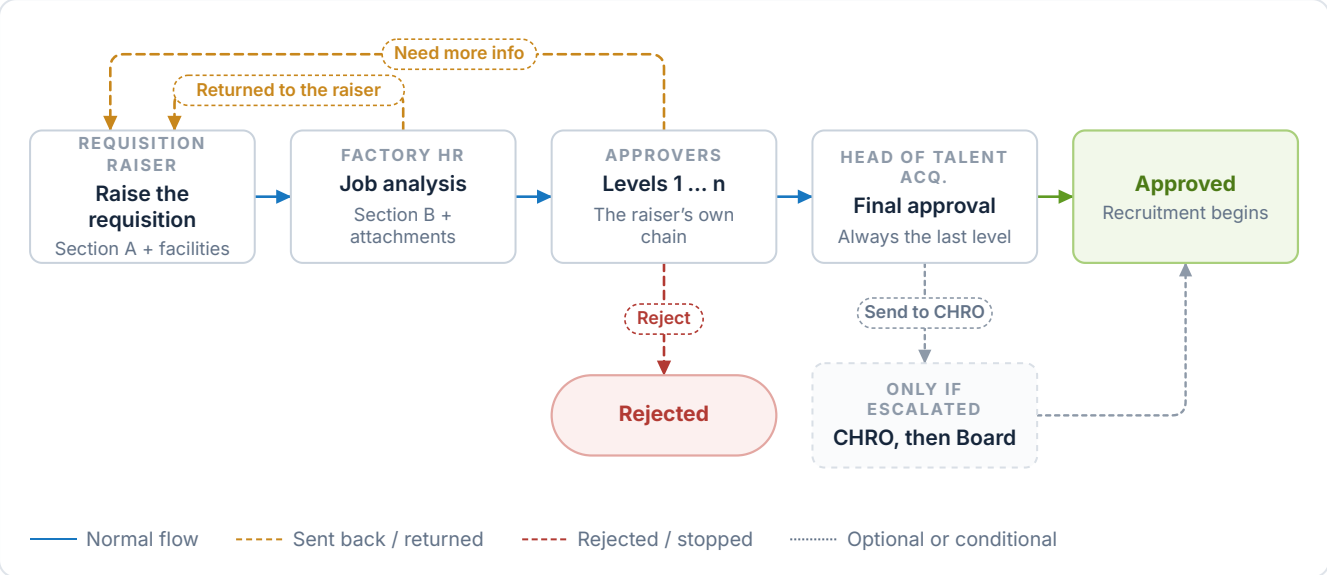

Figure 2. The requisition's journey. Any approver may reject it; only the final level may escalate it to the CHRO, who may in turn send it to the Board.

4.1 Raising a requisition

A **Requisition Raiser** opens the digital Employee Requisition Form for a unit they are nominated for. The form has two steps:

Vacancy Information (section A)

- Placement — unit, line of business, department, section, sub-section
- Designation, with optional alternative levels ("Officer / Senior Officer")
- Type — **New** (additional headcount) or **Replace** (naming each leaver and the reason)
- Posts required; vacant posts (from the organogram)
- Place of posting, vacant date, date needed, priority, permanent / temporary / contractual

Facility Requirements

- Laptop or desktop
- Transport — shared or full-time car (and vehicle type)
- Dormitory
- Seating — existing or new seat
- Transport and dormitory always carry their availability conditions

Sending it (**Send for job analysis**) gives the requisition its code — **REQ-year-number** — and its status Job Analysis.

4.2 New or replacement, and the organogram

The raiser states whether the post is new or a replacement. The organogram — each unit's sanctioned and filled seats, maintained in Unit Configuration — supplies the number of vacant posts on the form, so approvers see the request against the sanctioned establishment.

4.3 Job analysis by Factory HR

Before any approver sees it, the requisition goes to the unit's **Factory HR**, who write section B — job description, education and training, experience and other requirements — and attach the detailed job description. The system can draft section B from section A for them to edit. Every on-duty Factory HR in the unit shares this queue; a colleague can continue another's draft, and the history records who did what. Factory HR may correct section A, or return the requisition to the raiser with a note.

If the unit has no Factory HR, or all are on leave, the job analysis falls back to Head of Talent Acquisition and the Corporate Recruiters. Submitting the job analysis starts the approval chain.

4.4 The approval chain

Each raiser has an **approval chain** for each unit: an ordered list of named approvers configured on Approval Paths. Two raisers in the same unit may route differently. **Head of Talent Acquisition is always appended as the final level**; a chain may otherwise be empty, in which case the requisition goes straight to Head of Talent Acquisition. The chain is copied onto the requisition when it is raised.

4.5 Decisions

Decision	Available to	Effect
Approve	Every level	Signs the level; the next level is notified. After the last level the requisition is Approved.
Need more info	Every level	Back to the raiser with a required remark. When resent, the chain restarts from level 1.
Reject	Every level	Closes the requisition as Rejected; the raiser is told.
Send to CHRO	Final level only	Appends a CHRO step and notifies the CHRO.
Send to Board	CHRO step only	The CHRO picks board members; each is emailed a link valid for 14 days. The first answer decides.

> **Only the named person can sign a level**
> Each configured level belongs to one person. Holding Head of Talent Acquisition does not let anyone jump the queue. The final level is the exception by design: any Head of Talent Acquisition may sign it. A super user can act on any step.

4.6 Corrections and the audit trail

While a requisition is in the chain, the approver holding it can edit its content; Factory HR can edit it during job analysis; Head of Talent Acquisition, the CHRO and the assigned recruiter can correct it at any time — for example, the job grade. Each change is written into the requisition's history with the name of whoever made it.

4.7 Requisition statuses

Status	What it means	Who holds it
Job Analysis	Raised; waiting for Factory HR to write section B — or returned to the raiser for changes.	Factory HR (or the raiser)
Pending Approval	In the approval chain. The Approvals tab shows the current level.	The named approver
Approved	Every level has signed. Talent Acquisition sets CV sources and a recruiter.	Head of Talent Acquisition
Profile Ready	The role profile for the advertisement has been saved.	Talent Acquisition / recruiter
Posted	Published on the DBL careers page; candidates are being collected and assessed.	Corporate Recruiter
Rejected	Turned down by an approver, with the reason recorded.	Closed

SECTION 5

Phase 2 — Sourcing and CV collection

From approval to a pipeline of screened candidates.

5.1 Launching recruitment

Figure 3. After approval. A recruiter cannot be assigned until the CV sources are saved.

- **CV sources** — Head of Talent Acquisition ticks where CVs will be collected: LinkedIn, BDJobs, Head Hunting, Social media, Career Site, Campus, Internal Posting, CV Bank, Talent Pool, Employee Referral.
- **Corporate Recruiter** — assigned from the holders of the role, they own recruitment from here.
- **Role profile** — drafted automatically from the job analysis, or generated by AI, or written by hand; optionally created the moment the requisition is approved.
- **Job posting** — with a closing date, the job goes live on the DBL careers page and a Google Drive workspace is created for its CVs. The recruiter can share the link, copy a ready-made social-media post, and publish on BDJobs.

5.2 Where CVs come from

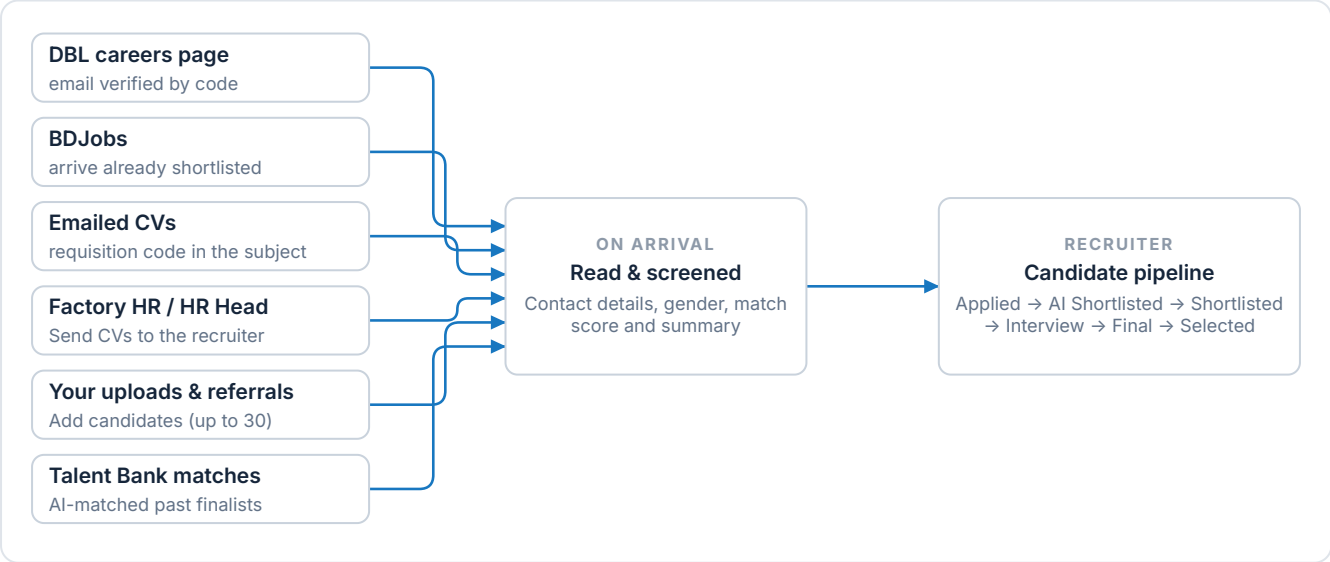

Figure 4. Every channel feeds the same pipeline; each CV is read and screened on arrival.

Channel	How it works
DBL careers page	Applicants prove their email with a 6-digit code, receive an application ID (APP-year-number) and a confirmation email, and can track their application.

Channel	How it works
BDJobs	DBL publishes the vacancy; BDJobs sends its own shortlisted applicants, who arrive at Shortlisted.
Emailed CVs	CVs sent to the recruitment mailbox with the requisition code in the subject are added every 15 minutes.
Factory HR / HR Head	Unit HR send CVs they have collected locally; the recruiter decides on them.
Recruiter uploads	Up to 30 CVs at once, each tagged with its source; candidates can also be added by name.
Employee referrals	Each referral has a reference (REF-year-number); referred candidates and the referrer receive letters.
Talent Bank	Past finalists are matched to the new requisition by AI and suggested to the recruiter.

5.3 Screening and the pipeline

On arrival each CV is read: missing contact details are filled in and the candidate's gender is recorded. The AI screen scores the CV against the role profile, explains the score criterion by criterion (met, partly met, gap) and writes a one-line summary. Candidates scoring at or above the configured threshold are marked **AI Shortlisted** — a suggestion; shortlisting is the recruiter's decision. Repeat applicants are recognised by email or mobile number.

Stage	Meaning
Applied	The CV has arrived from any channel and is in the pipeline.
AI Shortlisted	The AI screen scored the CV at or above the match threshold. A suggestion for the recruiter, not a decision.
Shortlisted	The recruiter has shortlisted the candidate. BDJobs applicants arrive here, already shortlisted by BDJobs.
Interview	An interview has been arranged — by the recruiter, or by the factory colleague the first interview was handed to.
Final	Through the first interview; ready for the second or final round with the recruiter.
Selected	Chosen for the post, with a finalized salary. Onboarding starts here.
Rejected	Not taken forward. A regret letter can be sent — never automatically.

5.4 The Talent Bank

Every candidate who reaches Final or Selected is kept in the Talent Bank automatically, and leaves it once their onboarding starts. Whenever a requisition is approved or posted — and nightly — the bank is matched against open requisitions, so strong candidates from past searches are offered again.

SECTION 6

Phase 3 — Assessment and interviews

Tests, a first interview — usually at the factory — then the second or final round.

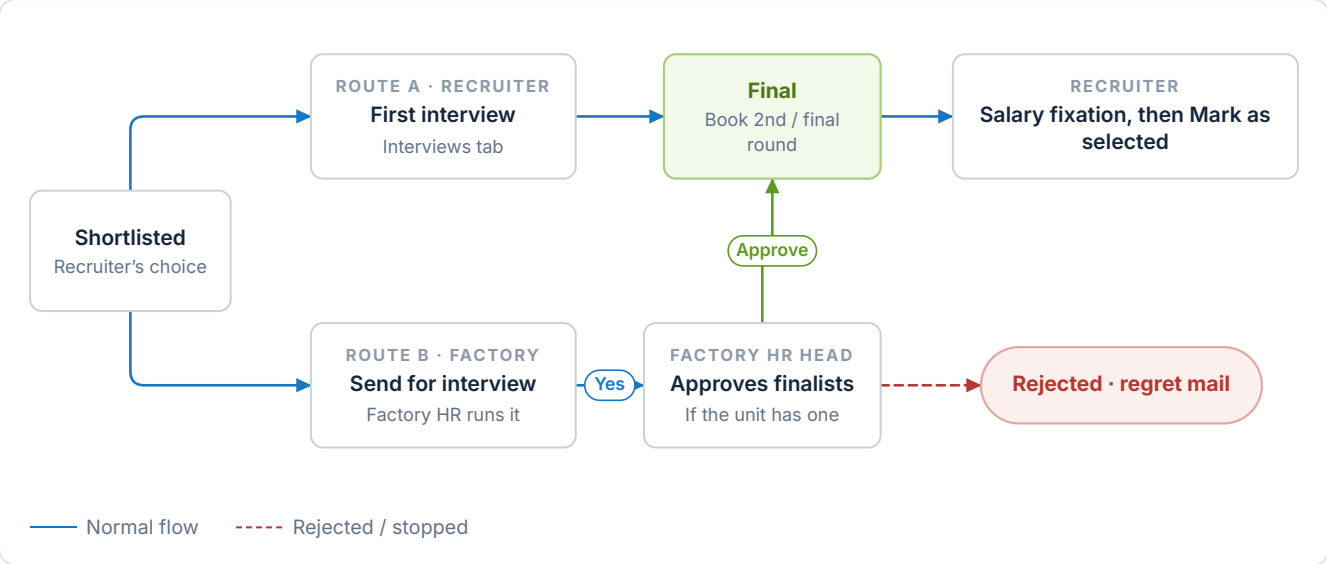

Figure 5. Two routes to the final round. While a factory holds a candidate's first interview, the recruiter sees it but cannot change it.

6.1 Screening tests

Three tests can be assigned per candidate: a **written test**, a **computer literacy** test (both sat in person and marked by HR), and an online **AI proficiency test**. The AI test draws questions at random from a bank tagged by job grade, can be timed, runs full-screen — leaving it is recorded and reported — and is marked automatically. Pass marks are configured centrally. A candidate cannot be put through the first interview while an assigned test is unmarked.

6.2 First interviews at the factory

The recruiter (or Head of Talent Acquisition) can hand shortlisted candidates to the unit's Factory HR — or any named colleague — to run the first interview, with any tests and a note. Delegates gain access to those candidates only. They schedule the session, form the panel, record attendance and test marks (which are then locked for them), and decide **Yes** or **No**.

In a unit with a **Factory HR Head**, every "Yes" goes to the Head, who approves (the candidate moves to Final), returns it to Factory HR with a note, or rejects it with a reason. A unit without a Head skips this step. Until the verdict is final, the first interview belongs to the factory; the recruiter can withdraw the hand-off, which is recorded.

6.3 Second and final interviews

Finalists come back to the recruiter, who books the second or final round. The factory's first round stays view-only. Interviews can be booked one by one or for a whole group in one go.

6.4 Scheduling rules

- Times are always **Dhaka time (GMT+6)**, whatever the device's own time zone.

- Online interviews get a Google Meet link; in-person ones name a location from the job-location list and a room.
- The panel is split into HR and other departments; HR panelists also record the candidate's current package and needs.
- The candidate can be sent a Google Calendar invitation and DBL's own email independently; panelists get a personal marking link and a calendar invitation.
- An interview can be rescheduled until someone has marked; everyone is told the new and old time, and marking links stay the same.

6.5 Panel evaluation

Each panelist scores the candidate on DBL's ten fixed criteria — the same scoring used later for salary fixation — and must give a recommendation. The recommendation is advice to the recruiter; nothing is decided automatically from it.

Criterion	Marks	The four answers offered
Education (related to the role)	8	Required, partly related · Required, related · Above required, partly related · Above required, related
Experience	8	Same four answers as Education
Training	4	Basic · Relevant · Adequate relevant · Abroad relevant
IT knowledge	4	Basic · Work perform · Intermediate · Expert
Leadership	4	Low · Moderate · High · Very high
Attitude & approach	4	Average · Fair · Good · Excellent
Presentation skill (includes written-test weight)	8	Average · Fair · Good · Excellent
Discretion on decision making	4	Rarely effective · Somehow effective · Effective · Highly effective
Position scarcity	4	Available · Partially available · Occasionally available · Rarely available
Complexity of work	2	Undemanding · Quiet · Complicated · Challenging
Total	**50**	Plus a required recommendation: **Select**, **Reject** or **Talent Pool**

SECTION 7

Phase 4 — Selection and salary

7.1 Salary fixation

For each finalist the recruiter fixes the salary in one screen. The panel's average score places the candidate on one of eleven salary bands within the job grade's range; the proposed gross salary is filled from the band and adjusted after negotiation.

Part	Content
Job grade	Sets the salary range.
Screening	Test results against pass marks; a failed screening blocks the salary from being finalized.
Committee score	The panel's average across the ten criteria, out of 50.
Salary band	One of 11 equal steps within the grade's range, chosen by the score.
Negotiation	Present salary, the candidate's expectation and current benefits.
Proposed gross salary	From the band, adjustable; then Finalize. A later change reopens it.

7.2 Selection

A candidate can be marked **Selected** only once their salary is finalized — the Board signs off on that figure. Selection opens the candidate's onboarding workspace.

7.3 Rejection and regret letters

Rejections record who rejected, where and why — a factory's first-interview rejection is distinguished from a central one. A rejected candidate can be sent DBL's standard regret letter: personal ("Dear "), naming the post, linking to the careers page. It is always a person's choice, never automatic, and goes once only; it can be sent with the rejection, later, or in bulk.

SECTION 8

Phase 5 — Pre-employment and onboarding

Six steps, each opening only when the one before it is complete.

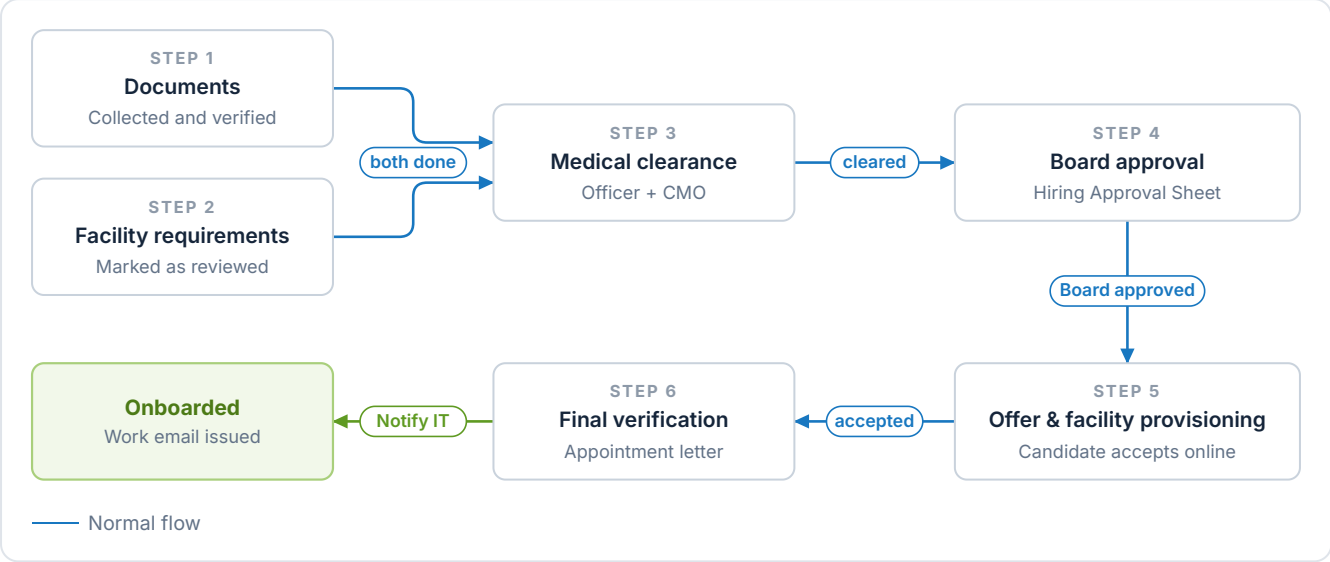

Figure 6. The onboarding gates. Documents and facilities run in parallel; everything after them is strictly in order.

Step	What happens	Opens when
1 · Documents	The candidate uploads joining documents on their portal; HR verifies each one (or records that originals were checked by hand).	Onboarding starts
2 · Facility requirements	HR reviews the facilities the post was approved for and selects Mark as Reviewed.	Onboarding starts
3 · Medical clearance	Recruiter requests the test; Head of Talent Acquisition schedules it; Medical Officer examines; Central Medical Officer confirms.	Documents verified and facilities reviewed
4 · Board approval	The candidate goes on a Hiring Approval Sheet: Head of Talent Acquisition → CHRO → Board.	Medical clearance confirmed
5 · Offer letter & facility provisioning	The offer goes out on the DBL pad; the candidate accepts or declines online; each facility is passed to the team that arranges it.	Board approval
6 · Final verification & completion	Placement (employee ID, line manager), Code of Conduct, final verification, appointment letter, then **Notify IT**: IT creates the work email and confirms from a link — and the hire is onboarded.	Offer accepted

8.1 The candidate portal and joining documents

The selected candidate receives a personal **Onboarding Portal** link. Joining documents are a fixed catalogue in seven groups — photographs, academic, professional and training, experience, identity and address, tax and salary, signature — uploaded as PDF, JPG or PNG. Passport photographs are checked automatically. HR verifies

or rejects each document with a reason. The four NID particulars are typed by the candidate exactly as printed, because they appear on the appointment letter and go to payroll. Originals checked in person can be recorded as such.

8.2 Facilities: review and provisioning

The facilities approved on the requisition — and any HR has added — must be reviewed and signed off (**Mark as Reviewed**) even when the hire is entitled to nothing, because that is exactly the case worth confirming. Once the offer is out, each facility is passed to the person who arranges it; they receive one action by email, **Confirm arranged**. Refusals are a conversation with HR, not a button in an email.

8.3 Medical clearance — two signatures

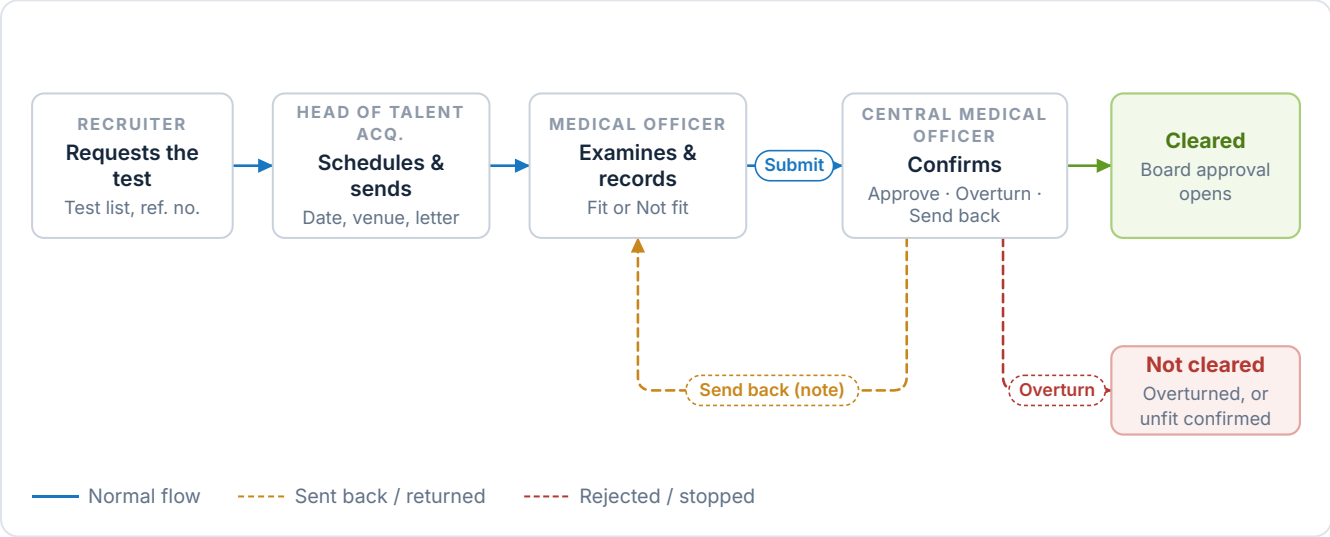

Figure 7. No candidate is medically cleared until the Central Medical Officer confirms the examining officer's finding. A result typed up from an outside clinic is recorded as manual and takes effect immediately.

8.4 Board approval — the Hiring Approval Sheet

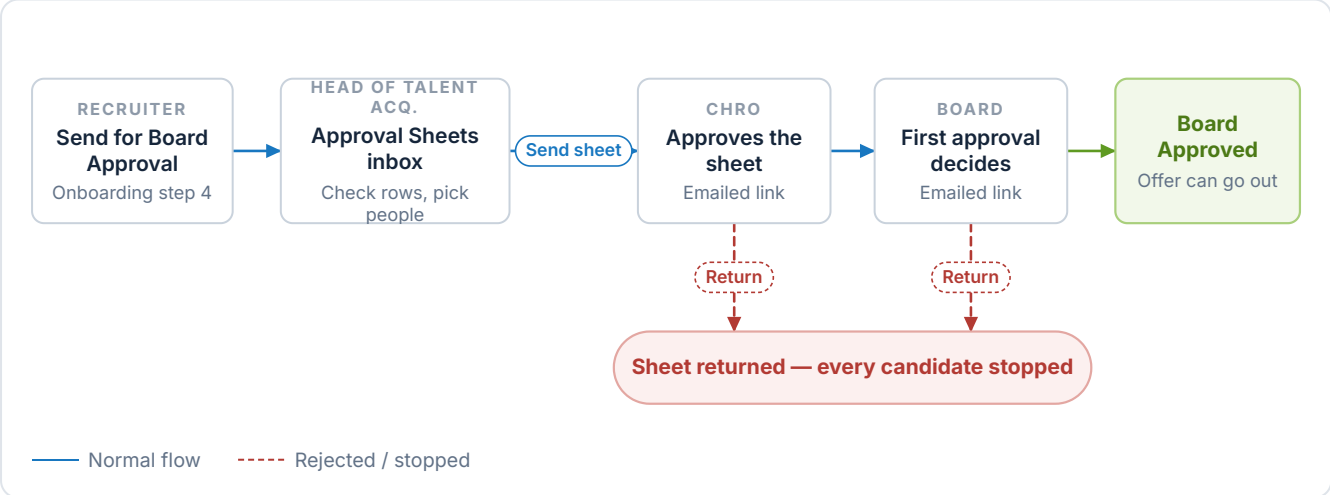

Figure 8. One decision for every candidate on the sheet, as on DBL's paper form.

The recruiter forwards the candidate; it lands, unaddressed, with every Head of Talent Acquisition. Whoever puts it on a **Hiring Approval Sheet** (reference HAS-year-number) owns it from there: they can correct the CV-derived columns, choose the CHRO and board members, send, track and resend. The CHRO's approval sends the same sheet to the Board; the first board approval completes it. A return at either stage stops the sheet, with the reason recorded against each candidate. Sheet links stay valid for 60 days.

8.5 The offer letter

After board approval the recruiter sends the offer: Junior/Mid or Senior wording, a tentative joining date and a **chosen CHRO** as signatory — their e-signature is embedded if they have one, otherwise a blank line is left to sign by hand. The letter is a one-page PDF on the DBL pad, emailed and filed on Drive. The candidate accepts online — signed with the signature already in their documents, producing a counter-signed copy — or declines with a reason.

8.6 Final verification, appointment and joining

- **Placement** — the employee ID and the line manager (picked from the directory and kept as a snapshot).
- **Code of Conduct** — sent to the portal; the candidate acknowledges and signs it.
- **Reference checks** — at least one, filled in by the recruiter with their e-signature, or recorded as done on paper.
- **Final verification** — refused, naming what is outstanding, until every required document is verified, medical is cleared, a reference check exists and the NID particulars are complete. HR can waive it with "Checked by Manual on hand".
- **Appointment letter** — on its own letterhead layout, with a chosen CHRO signatory.
- **Notify IT** — HR sends IT the request for the work email in DBL's usual format and, for a replacement, asks for each leaver's account to be deleted. IT confirms from the link in the email: the address is recorded, the hire is **Onboarded**, and the requester receives IT's "completed" reply. An address that arrives another way can still be recorded by hand.

The hiring file
Every onboarding can be printed as a full numbered record — from the requisition and its approval chain to the candidate's history — or as a one-page employee summary on the DBL pad.

SECTION 9

Notifications, emails and reminders

9.1 In the system

Each notification is stored, pushed instantly to the person's screen with a short sound, and shown under the bell with a link to the item. Open pages update themselves when something changes — nobody needs to reload. Notifications are kept for 60 days.

9.2 By email

- Staff receive their notifications by email too, unless they switch email off under Account settings.
- Letters to candidates — such as the application confirmation, the regret letter and referral letters — use one DBL-branded layout with the logo; offer and appointment letters are PDFs on the DBL letterhead.
- Every system email ends with a no-reply notice: "This is an automated email generated by the DBL Group Recruitment System. Please do not reply to this email."
- A master switch held by the platform administrator stops all outgoing email; calendar events are then created without inviting anyone.

9.3 Reminders and automation

Automation	When
Reminders to approvers with requisitions waiting, and panelists with marks to submit	Every morning
CVs emailed to the recruitment mailbox added to the right pipeline	Every 15 minutes
Employee master synchronised from ZingHR	Nightly
Talent Bank matched against open requisitions	Nightly, and on approval or posting
Database backed up to a private Drive folder (last 30 kept)	Nightly
Activity log, notifications and API logs trimmed to their retention periods	Nightly

9.4 Who hears what

Moment	Told
Requisition waiting for job analysis	The unit's on-duty Factory HR (or the fallback)
Requisition reaches a level	That level's approver
Need more info / approved / rejected / posted	The raiser
Recruiter assigned	The recruiter
Candidates handed to a factory; finalists put through	The delegate; the Factory HR Head; the recruiter

Moment	Told
Forwarded for board approval; sheet decided	Head of Talent Acquisition; the recruiter
Medical requested; medical due; finding submitted; decided	Head of Talent Acquisition; medical officers; the recruiting side
Offer accepted or declined; facility arranged	The recruiting side
Notify IT sent; IT confirms the work email	IT, and anyone HR added on CC; then the requester and those on CC (IT's reply) and the recruiting side

SECTION 10

Administration and configuration

Screen	Who uses it	What it controls
Access Control	Platform administrator, super users	Who can sign in and what they can do; HR Layering (Factory HR priority and who is away); the role catalogue; password resets.
Approval Paths	Head of Talent Acquisition, CHRO, super users	Raisers per unit and each raiser's chain of named approvers.
Unit Config	Head of Talent Acquisition, CHRO, SBU Heads (own units), super users	Units, departments, sections and sanctioned seats; drives the organogram.
AI Settings	Head of Talent Acquisition, CHRO, super users	AI shortlist threshold; automatic screening; automatic role profiles; test pass marks.
Board Groups	Head of Talent Acquisition, CHRO, super users	Named groups of board members for approval sheets.
AI Proficiency Bank	Head of Talent Acquisition, CHRO, super users	Questions for the online AI test, by job grade.
Integrations	Platform administrator	ZingHR sync, Google, BDJobs, automation, the master email switch, and where Notify IT sends its requests.
System Activity · API Logs	Platform administrator, super users	Every change (30 days); failed or slow requests and browser errors (7 days).

10.1 Leave and cover

Factory HR and Corporate Recruiters — the two roles that carry work others must pick up — have an availability button. Leave is a dated period that ends by itself. A Factory HR on leave drops out of the job-analysis queue; a recruiter on leave names a stand-in for each requisition, who gains access alongside them until the leave ends.

10.2 Keeping unit names consistent

Units are matched by name across ZingHR, the organogram and role assignments. Configure units and grant roles on exactly the name employees are synchronised under (for example, including a trailing full stop where ZingHR has one).

SECTION 11

Records, security and data protection

11.1 Audit trail and retention

Record	Kept for
Each requisition's own history: edits, decisions, hand-overs	Permanently, with the requisition
System Activity: every change across the system	30 days
Notifications	60 days
API Logs: failures, slow requests, browser errors	7 days
Database backups	Nightly copies; the last 30 kept, plus a verified copy before every release

11.2 Security controls

- Sign-in by email and password; new passwords 6–12 characters; five wrong attempts lock the account for 15 minutes.
- Optional two-factor authentication by authenticator app or emailed code.
- Sessions last 24 hours; signing out ends only that session; a password change or reset ends them all.
- Password recovery by a 6-digit emailed code that never reveals whether an address is registered.
- Role-based access on every screen and every request, enforced on the server.
- E-signatures visible only to their owner; letters embed them on the server.
- Careers applications require a verified email address.
- Board, panel, candidate and facility links are personal and open a single item.

11.3 Where the data lives

The website, application and database run on one dedicated server on DBL Group's network, served over HTTPS at talenthub.dbl-group.com. CVs, letters and joining documents are stored in DBL's own Google Drive under the recruitment account, and system email is sent from the same account.

11.4 How changes are released

Changes are first tested on a separate test server that runs on a nightly copy of the live data, where no email, calendar invitation or job posting leaves the system. Releases to production are made by one controlled script that backs up the database before any change and rolls back automatically if the release fails.

SECTION 12

Appendices

A Glossary

Term	Meaning
Requisition	The digital Employee Requisition Form: a request to fill one or more posts.
Section A / Section B	Vacancy information (by the raiser) / job analysis (by Factory HR).
Approval path / chain	The ordered list of named approvers for a raiser in a unit, ending with Head of Talent Acquisition.
Escalation	The final level sending a requisition to the CHRO, who may send it to the Board.
Role profile	The job advertisement's summary, responsibilities and requirements.
Pipeline / stage	A requisition's candidates and where each stands: Applied to Selected or Rejected.
Match score	The AI's assessment of a CV against the role profile, with reasons.
Talent Bank	Past finalists kept and matched to new requisitions.
Hand-off (delegation)	Sending shortlisted candidates to a factory colleague for their first interview.
Recommendation	A panelist's advice — Select, Reject or Talent Pool — alongside their scores.
Salary fixation	Deriving the proposed salary from job grade, committee score and negotiation.
Hiring Approval Sheet	The board-approval form for one or more selected candidates (HAS-year-number).
Onboarding portal	The candidate's personal page for documents, offer and Code of Conduct.
Final verification	The check that every required item is complete before the appointment letter.
Organogram	Each unit's sanctioned, filled and vacant seats.
HR Layering	The priority order of a unit's Factory HR, shown with who is away.

B Reference numbers

Reference	Format	Example
Requisition	REQ-year-sequence (the sequence continues across years)	REQ-2026-015
Application	APP-year-number	APP-2026-123
Employee referral	REF-year-number	REF-2026-8
Hiring Approval Sheet	HAS-year-sequence	HAS-2026-0007

C Time limits and validity

Item	Limit
Signed-in session	24 hours
Account lock after 5 wrong passwords	15 minutes
Password reset code	10 minutes; cancelled after 5 wrong tries; 60 seconds between codes
Careers email verification code	10 minutes; 5 tries; 60 seconds between codes; 5 per hour; verified for an hour
Board link for a requisition	14 days
Hiring Approval Sheet link	60 days
Leave	3, 7 or 15 days, or a chosen last day; ends automatically
Emailed-CV pick-up	Every 15 minutes
Notify IT confirmation link	30 days; sending again issues a new link

D Medical and onboarding states

State	Meaning
Awaiting exam	Due for examination by a Medical Officer.
Submitted	Finding recorded; awaiting the Central Medical Officer.
Sent back	Returned to the examining officer to correct or re-test.
Cleared	Confirmed fit; board approval opens.
Not cleared	Confirmed unfit or overturned.
Board Approved	The Hiring Approval Sheet was approved; the offer can be sent.
Onboarded	Final verification complete, appointment letter sent, work email issued.

E Index of role guides

No.	Guide	For
01	Requisition Raiser	Department and division heads who raise requisitions
02	Factory HR	Unit HR: job analysis, CV intake, first interviews
03	Requisition Approver	Unit approvers, SBU Heads and other named approvers
04	Head of Talent Acquisition	Final approval, recruitment launch, approval sheets

No.	Guide	For
05	CHRO	Escalations, approval sheets, letter signing
06	Board Member	Requisition and hiring approvals by emailed link
07	Corporate Recruiter	End-to-end recruitment and onboarding
08	Factory HR Head	First-interview finalist approvals
09	Interview Panelist & Interviewer	Panel scoring; delegated first interviews
10	Medical Officer & Central Medical Officer	Two-step medical clearance
11	The Candidate Journey	What applicants and new hires see
12	System Administrator & Super User	Access, set-up, integrations, records

Prepared by the IT Department, DBL Group, from the system as deployed on 12 October 2026. Screens and wording may change as the system develops; the role guides and this document will be revised with each significant release.
