ROLE GUIDE 04

04

Head of Talent Acquisition

Final approval of every requisition, launching recruitment, Hiring Approval Sheets, medical requests and the settings that drive the workflow.

WHO THIS IS FOR

Head of Talent Acquisition and the corporate talent-acquisition team holding this role.

WHAT YOU DO IN TALENTHUB

1

Set who raises and who approves

Approval Paths: each raiser and their chain, per unit. You are always the final level.

2

Launch recruitment

CV sources, a Corporate Recruiter, the role profile and the job posting.

3

Send hires to the board

Hiring Approval Sheets to the CHRO and the board; medical requests dated and sent.

SECTION 1

1 Your role at a glance

IN SHORT

You sit at the centre of the workflow. You decide **who may raise requisitions and who approves them**, give the **final approval on every requisition**, and launch recruitment by choosing CV sources and assigning a Corporate Recruiter.

Later in the process you assemble **Hiring Approval Sheets** for the CHRO and the Board, and you schedule and send **medical tests**. You see every requisition in every unit, and you can step into any part of the recruiter's work.

WHAT YOU DO

- Configure Approval Paths: raisers and their chains
- Final approval; escalate to the CHRO when needed
- Choose CV sources and assign the recruiter
- Build and send Hiring Approval Sheets
- Schedule and send medical tests

WHAT YOU CAN ALSO DO

- Write a job analysis where no Factory HR is available
- Run any part of recruitment the recruiter does
- Correct a requisition at any time (logged)
- Maintain AI settings, board groups and the question bank

WHAT STARTS YOUR WORK

A requisition reaching the final level; an approved requisition with no recruiter; candidates forwarded for board approval; medical tests requested.

WHO YOU HAND OVER TO

The Corporate Recruiter (recruitment), the CHRO (escalations and approval sheets), the medical team (tests).

Where you fit in the hiring lifecycle

PHASE 1
Manpower Requisition
- Raise the requisition
- Job analysis
- **Approval chain**
- CHRO / Board (if escalated)

PHASE 2
Sourcing & CV Collection
- **CV sources & recruiter**
- Role profile & job posting
- CVs arrive from all channels
- AI screening & shortlist

PHASE 3
Assessment & Interviews
- Screening tests
- First interview
- Factory HR Head approval
- Second / final interview

PHASE 4
Selection & Salary
- Panel evaluation
- Salary fixation
- Mark as selected
- Regret letters

PHASE 5
Pre-employment & Onboarding
- Documents & facilities
- **Medical clearance**
- **Board approval & offer**
- Verification & joining

SECTION 2

2 Access and signing in

2.1 How you get the role

The Head of Talent Acquisition role is granted group-wide by a super user on Access Control. It gives you every requisition in every unit and the recruitment screens. (In the system the role's internal name is "Corporate HR"; it is displayed as Head of Talent Acquisition.)

2.2 Signing in

1. **Open the system**
   Go to **https://talenthub.dbl-group.com** in Chrome, Edge or another current browser, on a computer or a phone.

2. **Sign in**
   Enter your DBL **email address** and password, then **Sign in**. Tick **Remember me** on your own device to keep your email filled in; your browser can save the password.

3. **First sign-in or after a reset**
   Your temporary password is your **employee code**. The system then asks you to choose your own password of 6 to 12 characters before you can continue.

- **Forgot your password?** Select **Forgot password?** on the sign-in page. A 6-digit code is emailed to you; it is valid for 10 minutes. Enter it, then set a new password. Every other session is signed out.
- **Locked out?** After 5 wrong passwords the account is locked for 15 minutes. A super user can also reset your password to your employee code.
- **Two-factor authentication** (recommended) is switched on under **Account settings** › **Security** — use an authenticator app or a code sent by email.
- **Sessions** last 24 hours; after that you sign in again. Signing out on one device does not sign you out anywhere else.

> **No role, no sign-in**
> The system lets a person sign in only while they hold at least one role. If you are told your account is not enabled for sign-in, ask Head of Talent Acquisition or a super user to check your access.

2.3 What you will see

Recruitment **Requisitions**
Every requisition, with status filters and counts.

Recruitment **Candidates / Talent Bank**
Every posted requisition's pipeline, and candidates kept for future roles.

Recruitment **Approval Sheets**
Candidates forwarded for board approval; sheets you have sent.

Recruitment **Medical Requests**
Tests requested by recruiters, waiting for a date and venue.

Configuration **Approval Paths**
Who raises requisitions in each unit, and each raiser's chain.

Configuration **Unit Config**
Units, departments, sections and sanctioned seats.

Configuration **AI Settings**
Screening threshold, automation and test pass marks.

Configuration **Board Groups · AI Proficiency Bank**
Board member groups; the AI proficiency question bank.

SECTION 3

3 Approval Paths: who raises, who approves

Routing is configuration, not code. Every raiser has their own chain, per unit.

1. **Open the unit**
   Go to **Configuration** › **Approval Paths**. Each unit shows its raisers, or **Not set up**.

2. **Add a raiser**
   Pick a department, then the person who should be able to open requisitions for the unit. They are marked **Grants access**: on saving they receive the Requisition Raiser role for that unit.

3. **Build their chain**
   Search for each approver and add them as a level. Give each step a label (for example "Unit Head"), and use **Move up** / **Move down** to order them. Anyone named receives the Unit Approver role on saving, so they can sign in.

4. **Save**
   Select **Save chain**. Head of Talent Acquisition is appended automatically as the final level — "Final approval, then assigns a recruiter" — so no chain can leave you out.

Rule	Effect
A chain may have zero levels	That raiser's requisitions go straight to you after job analysis.
A raiser cannot approve their own requisition	Refused when the chain is saved.
No chain, no raising	A raiser without a chain in a unit is refused there, with the unit named. Access Control flags them with a **No approval path** chip.
Chains are copied at raise time	Editing a chain affects only requisitions raised afterwards.
Removing access cleans up	Removing someone's Requisition Raiser role deletes their chain for that unit; removing Unit Approver takes them off every level (the rest are renumbered). Requisitions in flight are untouched.

SECTION 4

4 Final approval and escalation

Your step is the last in every chain. Unlike the configured levels, it is not addressed to one person: **any Head of Talent Acquisition** may sign it. Open the requisition's Approvals tab and choose:

Decision	Effect
Approve	The requisition becomes Approved. The raiser is told; recruitment can begin.
Need more info	Back to the raiser with your remark (required). On resend the chain restarts at level 1.
Reject	Closed as Rejected. Give the reason in the remark.
Send to CHRO	Adds a CHRO step and notifies the CHRO. The CHRO may approve, reject, or send it on to the Board — see the CHRO guide.

Standing in for Factory HR

If a unit has no Factory HR, or all of them are on leave, a raised requisition's job analysis comes to you and the Corporate Recruiters instead. You complete it exactly as Factory HR would: section B, attachments, then Submit for approval.

You can correct a requisition at any time

Head of Talent Acquisition, the CHRO and the assigned recruiter own the requisition as a document for its whole life — a wrong grade or a mistyped post count does not need to go back through the chain. Every change is written into its history with your name.

4.1 Requisition statuses

Status	What it means	Who holds it
Job Analysis	Raised; waiting for Factory HR to write section B — or returned to the raiser for changes.	Factory HR (or the raiser)
Pending Approval	In the approval chain. The Approvals tab shows the current level.	The named approver
Approved	Every level has signed. Talent Acquisition sets CV sources and a recruiter.	Head of Talent Acquisition
Profile Ready	The role profile for the advertisement has been saved.	Talent Acquisition / recruiter
Posted	Published on the DBL careers page; candidates are being collected and assessed.	Corporate Recruiter
Rejected	Turned down by an approver, with the reason recorded.	Closed

SECTION 5

5 Launching recruitment

From approval to a live job posting.

Figure 1. After approval. Assigning a recruiter is refused until the CV sources are saved.

1 **Tick the CV sources**
On the requisition's **Profile & Posting** tab, under **CV collection sources**, tick where CVs will be collected: LinkedIn, BDJobs, Head Hunting, Social media, Career Site, Campus, Internal Posting, CV Bank, Talent Pool, Employee Referral. Select **Save sources**.

2 **Assign the Corporate Recruiter**
Pick from the holders of the Corporate Recruiter role. They are notified and own the requisition's recruitment from now on. You, the CHRO and they all keep access — assigning gives the requisition an owner, it does not lock anyone out.

3 **Role profile**

With no profile yet, the tab shows one drafted from Factory HR's job analysis: responsibilities from the job description, requirements from education, experience and others. **Use this profile** saves it; **Regenerate** asks the AI for a new one; **Write manually** lets you type it. If **Auto-generate role profile on approval** is on in AI Settings, one is created the moment the requisition is approved.

4 **Publish**

Set the closing date and select **Publish job posting**. The job appears on the DBL careers page, the status becomes Posted, and a Google Drive workspace is created for its CVs. **Share job link** and **Social post** help spread it; **Post to BDJobs** on the pipeline publishes it there when BDJobs posting is enabled.

Facilities

On the Approvals or Details tab, the recruitment side confirms or skips each facility the raiser requested, with an HR note, and may grant one that was not requested. These decisions travel into onboarding.

SECTION 6

6 Overseeing recruitment

You have the same tools as the recruiter on every posted requisition: the candidate pipeline, AI screening, shortlisting, sending candidates to a factory for their first interview, scheduling interviews, salary fixation and onboarding. The **Corporate Recruiter** guide describes them in full. **Candidates** lists every posted requisition with its pipeline; **Talent Bank** holds candidates kept for future roles.

A few acts are yours alone: building Hiring Approval Sheets, scheduling medical tests and sending the medical letter directly.

SECTION 7

7 Hiring Approval Sheets

Board approval for selected candidates — DBL's paper approval sheet, in the system.

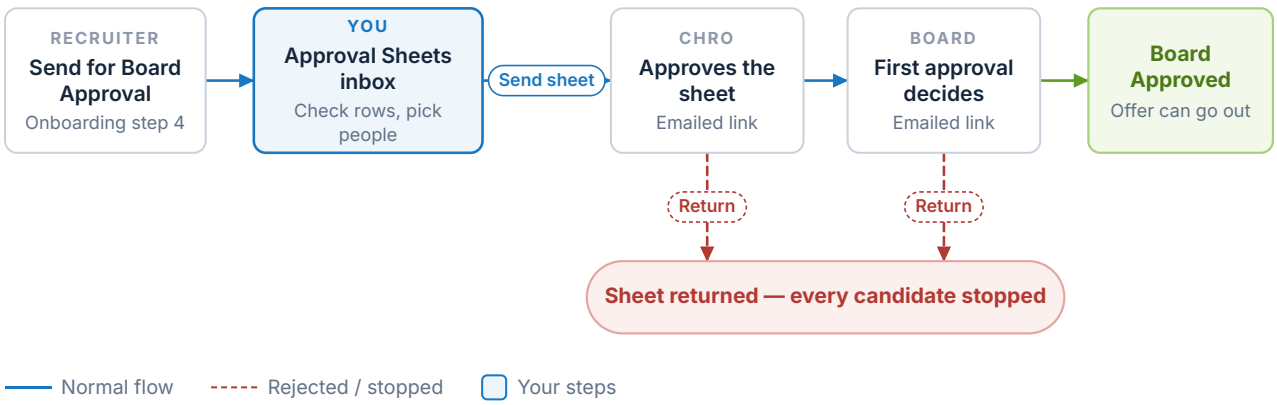

Figure 2. A sheet carries one decision for every candidate on it. One board member's approval completes it; a rejection at either stage stops the whole sheet, with the reason recorded against each candidate.

1 Requests arrive

When a recruiter selects **Send for Board Approval** for a candidate, it lands, unaddressed, in every Head of Talent Acquisition's **Approval Sheets** under **Waiting on you**. Once you put it on a sheet, it is yours and out of the recruiter's hands.

2 Check the rows

Each row shows the candidate, the post and the terms, with columns read from the CV — education, last organisation and experience. Correct any of those before sending.

3 Choose who signs

Tick the candidates for this sheet — one or twenty — then pick the CHRO and the board members (Board Groups offers ready-made lists).

4 Send

Select **Send sheet**. The CHRO receives a link to the sheet. When the CHRO approves, the same sheet goes to the board members; the first board approval completes it.

5 Track and resend

Under **Sheets you have sent** you see where each sheet has got to in the chain. If a link was lost, resend the current stage. Each sheet can be exported to Excel or printed.

Links that last
Board members act on their own schedule, so sheet links stay valid for 60 days. Each link opens only that sheet and stops working once its holder has decided.

SECTION 8

8 Medical Requests

Recruiters request a pre-employment medical test from a candidate's onboarding page: the test list (below 40, or 40 and above), salutation and reference number. Nothing is emailed at that point — the request waits for you on **Medical Requests**.

1. **Set date and venue**
   For each candidate set the date, time and venue — or tick several and apply one to all.

2. **Choose recipients**
   Send to the medical team, the candidate, or both.

3. **Send**
   Select **Send separately**. Each candidate gets a separate email; the medical team receives the pre-employment medical test letter.

The Medical Officer then examines the candidate and records the findings; the Central Medical Officer confirms them. See the Medical Officer guide.

SECTION 9

9 Settings you look after

Screen	What you set
Configuration › **AI Settings**	**AI shortlist match threshold** (CVs scoring at or above it are marked AI Shortlisted) · **Auto-screen new CVs** · **Auto-generate role profile on approval** · **Screening test pass marks** for the written, computer literacy and AI proficiency tests.
Configuration › **Board Groups**	Named groups of board members, so a sheet's signatories can be picked in one go.

Screen	What you set
Configuration › **AI Proficiency Bank**	The question bank for the online AI proficiency test, tagged by job grade. Add questions by hand or generate them with AI, then review.
Configuration › **Unit Config**	Units → departments → sections → sanctioned seats, with filled counts. Drives the organogram and the vacant-post figure on requisitions.

SECTION 10

10 Notifications

Everything that needs your attention arrives in three ways. The **bell** at the top right shows a count and a list; a new notification also plays a short sound and appears briefly on screen, and open pages refresh themselves — there is no need to reload. If **Email notifications** is on under **Account settings** › **Notifications**, the same notification is emailed to you.

Each morning the system also sends a **reminder** to anyone who has a requisition waiting on their approval or interview marks still to submit.

- A requisition reaches the final level and needs your approval.
- A job analysis falls back to you because no Factory HR is available.
- A candidate is forwarded for board approval (“Candidate awaiting an approval sheet”); a sheet you sent is approved or returned at either stage.
- A recruiter requests a medical test (“Medical test to schedule”).
- IT has created a hire’s work email (“Work email created”) — the onboarding is complete.

SECTION 11

11 Questions and answers

Q **Why can I not assign a recruiter?**

The CV sources have not been saved yet. Tick at least one source and select Save sources first.

Q **A raiser says they cannot raise for a unit.**

Check Approval Paths: they need to be a raiser in that unit with a saved chain. Access Control shows a No approval path chip where the chain is missing.

Q **Two of us hold Head of Talent Acquisition. Who signs?**

Either. The final level is open to any holder; the first to act decides.

Q **Can the recruiter still change a candidate once it is on a sheet?**

No. Once you put a candidate on a sheet, the board approval is out of the recruiter’s hands.

Q **A board member never received the link.**

Open the sheet under Sheets you have sent and resend the current stage.

12

SECTION 12

Quick reference

A one-page summary you can print and keep beside you.

Head of Talent Acquisition — quick reference

CONFIGURE

- Approval Paths: raiser → levels → **Save chain**
- You are always the final level
- AI Settings · Board Groups · AI Proficiency Bank

APPROVE

- Approve · Need more info · Reject
- **Send to CHRO** to escalate
- Correct any requisition at any time (logged)

LAUNCH

- Profile & Posting → tick CV sources → **Save sources**
- Assign the Corporate Recruiter
- Role profile → closing date → **Publish job posting**

APPROVE HIRES & MEDICALS

- Approval Sheets → tick → CHRO + board → **Send sheet**
- Medical Requests → date, venue → send
- Resend lost links from the sheet
